

Phasing-out form

Oxycodon – Slow-acting SUSTAINED-RELEASE medicine

- Oxycodon is a strong painkiller and you should phase it out over a few days in order to avoid discomfort when you stop taking it.
- You decide yourself when to start phasing out*
- The form is intended to serve as a guide for how to phase out Oxycodon
- Because Oxycodon can cause constipation, you can expect to need to take a laxative while you are taking Oxycodon

Pt label

Oxycodon tablet reduced by mg every 2 days.
